PhD SCHOLARSHIP

Applications are invited for a PhD scholarship in Prof. Rossjohn's lab.

<http://research.med.monash.edu.au/rossjohn/>

The project is within the immunity group and will be focused on Natural Killer T-cell receptor recognition of glycolipid antigens and will involve molecular biology, protein expression and purification, structural and cellular immunology techniques. The successful applicant will join a group of researchers with a proven international track record in the field of immunology and structural biology (eg see Borg et al, Nature 2007; Pellicci et al., Immunity 2009).

The scholarship is for 3 years, at a stipend equivalent to Australian Postgraduate Award rates. Applicants should have a science degree, ideally with first class honours (or H1 equivalent).

Please direct all enquires to Susan Reynolds (susan.reynolds@med.monash.edu.au); tel: (613) 9902 9252
